## Magician's Woofle Dust

While I was cleaning out my great-uncle's apartment I found two boxes full of woofle dust. I believe this is from the 70s, or at least from some point before new manufacture of woofle dust was prohibited in '82. To be clear, this is NOT synthetic, this stock comes from the last years when natural WD was available.

It still works like new. I tried it with vanishes, appearances, transformations, and restorations and it worked perfectly. Could not have been smoother. Activation time was almost immediate.

Can also be used for mind control.

I am selling this by the gram. Please contact me for the price as it will vary by amount requested. I would prefer to do the transaction in person. Postal transactions will cost significantly more and I cannot guarantee delivery once it leaves my hands. In the past I've found that a package of woofle dust will almost certainly disappear in transit, along with any record of it in the postal database. The additional shipping and handling costs will cover having the package wrapped in blessed papyrus which makes it much more likely to get to you.

- do NOT contact me with unsolicited services or offers
